PROFESSIONAL SUMMARY

Architect & Landscape Architect with 5+ years of experience delivering architectural and landscape packages across buildings, parks, streetscape, and large-scale developments in Saudi Arabia and Egypt. SCE-accredited Architect experienced in design development, shop drawings, technical detailing, quantity take-offs, material submittals, and consultant approvals, supported by BIM-based documentation workflows.

CORE COMPETENCIES

Architectural Packages • Landscape Packages • Technical Office • Design Development • Shop Drawings • Construction Details • BIM-Based Documentation • Drawing Review • Quantity Take-Offs • Material Submittals • As-Built Drawings

PROFESSIONAL EXPERIENCE

SAFWA RIYADH GENERAL CONTRACTING CO. | Riyadh, Saudi Arabia | Nov 2025 - Present

Architect & Landscape Architect - Technical Office (Head Office)

- Deliver architectural and landscape technical office packages across **building, park, and streetscape projects**, covering design development, shop drawings, quantity take-offs, technical reviews, and drawing revisions.
- Produce architectural and landscape **shop drawings, working drawings, and technical details** by integrating structural, civil, MEP, and other discipline requirements.
- Evaluate supplier technical data, samples, materials, finishes, and product proposals **against project specifications** to support compliant material selection.
- Coordinate **material submittals and consultant approval follow-up**, aligning technical requirements among suppliers, consultants, and project teams.

SELECTED PROJECTS

Security Aviation Leadership Building - Riyadh, Saudi Arabia

Consultant: El Seif Engineering Consultants | **Area per Floor:** 1,400 m² | **Configuration:** 5 Floors | **Role:** BIM Architect - Technical Office

- Developed the architectural redesign and design-development package for a **five-floor building with approximately 1,400 m² per floor** in line with updated project requirements.
- Developed and maintained the **architectural Revit model** and delivered **design, working, and shop drawings** with technical details through BIM-based workflows.
- Produced **architectural quantity take-offs** to support scope and quantity verification.
- Coordinated architectural interfaces with **structural, MEP, civil, and other disciplines**, supporting resolution of design conflicts and drawing inconsistencies.
- Reviewed architectural **finishes, supplier technical data, and material submittals** through consultant review and approval.

Housing Projects Parks - Saudi Arabia

Owner: Ministry of Municipalities and Housing | **Consultant:** Aldarh Engineering Consulting Co. | **Owner's Consultant:** Parsons

Total Landscape Area: Approx. 98,000 m² | **Scope:** 11 Parks - 6 West Airport, 3 Qiran, 2 Al Uyaynah | **Role:** Technical Office Landscape Architect

- Delivered landscape shop-drawing, technical-detail, and documentation packages for **11 parks totaling approximately 98,000 m²**, adapting design solutions to project and site requirements.
- Coordinated landscape packages, supplier requirements, material reviews, and submittals to support **specification compliance and consultant approval**.

Marsa, Khuzam - Riyadh, Saudi Arabia

Owner: National Housing Company (NHC) | **Consultant:** Zuhair Fayez Partnership | **Area:** Approx. 35,000 m² | **Scope:** 6 Landscape Parks

Role: Technical Office Landscape Architect

- Developed landscape shop drawings and refined design details for **six parks totaling approximately 35,000 m²**.
- Created **3D models and visualizations** to communicate design proposals and support technical reviews and client presentations.

Sedayem Jeddah - Streetscape Project

Location: Jeddah, Saudi Arabia | **Owner:** National Housing Company (NHC) | **Consultant:** Khatib & Alami | **Role:** Technical Office Landscape Architect

- Translated streetscape and landscape requirements into **construction-ready shop drawings, technical details, and site implementation solutions**.
- Integrated **related-discipline requirements** and coordinated **material submittals** to support consultant review and package consistency.

Jeddah Park Project - Jeddah, Saudi Arabia

Owner: National Housing Company (NHC) | Consultant: Khatib & Alami | Park Area: 78,000 m² | Role: Technical Office Landscape Architect

- Prepared landscape shop drawings, technical details, and material-submittal packages for consultant review.

Al Ula Project - Saudi Arabia

Owner: Ministry of Housing | **Consultant:** Aldarh Engineering Consulting Co. | **Project Area:** Approx. 20,000 m² | **Role:** Technical Office Landscape Architect

- Delivered landscape shop drawings, construction details, and technical documentation for an **approximately 20,000 m² development**, adapting solutions to project requirements and site conditions.
- Produced **3D models and presentation visuals** to communicate landscape proposals and support design reviews and stakeholder discussions.

ZAID AL-HUSSEIN & BROTHERS CONTRACTING GROUP | Riyadh, Saudi Arabia | Nov 2023 - Nov 2025

Technical Office Landscape Architect

King Abdullah International Gardens - Riyadh, Saudi Arabia

Owner: Riyadh Municipality | **Consultant:** Dar Al-Handasah

Project Area: Approx. 2 Million m² (overall project) | **Project Value:** Approx. SAR 3 Billion | **Scope:** Landscape Packages

- Delivered technical office packages for landscape works on a mega-project covering **approximately 2 million m² overall** and valued at **approximately SAR 3 billion**.
- Produced and reviewed coordinated **landscape and hardscape shop/construction drawings** covering setting-out, coordinates, grading, levels, sections, and technical details.
- Produced and reviewed **landscape as-built drawings** reflecting verified site conditions and executed works.
- Converted **IFC information, consultant feedback, client requirements, design revisions, and site conditions** into buildable technical solutions and updated drawing packages.
- Assembled consultant-submission drawing packages and checked consistency across **plans, levels, sections, details, and related disciplines**.
- Coordinated landscape interfaces with **architectural, structural, civil, and MEP teams** to identify and support resolution of multidisciplinary clashes.
- Verified landscape and subcontractor works against **approved drawings, specifications, and design requirements** before consultant inspections.
- Developed **revised technical drawings and buildable solutions** to address construction issues arising during site execution.

ZAD ENGINEERING CONSULTING OFFICE | Egypt | Jul 2021 - Nov 2023

Technical Office Architect

- Delivered architectural **shop, working, and as-built drawing packages** with construction details for residential and commercial projects.
- Produced **code-compliant building permit drawings** for residential and commercial projects, supporting regulatory submissions.
- Produced **architectural quantity take-offs** and created architectural and landscape **3D models, visualizations, and detailed drawings** to support design development and technical documentation.
