King Abdullah International Gardens

Technical Office Landscape Architect | 11/2023 - 11/2025

Wider development context. My contribution covers landscape technical-office packages.

EMPLOYER

Zaid Al-Hussein and Brothers Contracting Group

CLIENT / CONSULTANT

Riyadh Municipality / Dar Al-Handasah

OVERALL DEVELOPMENT

2 million m² | Approx. SAR 3 billion

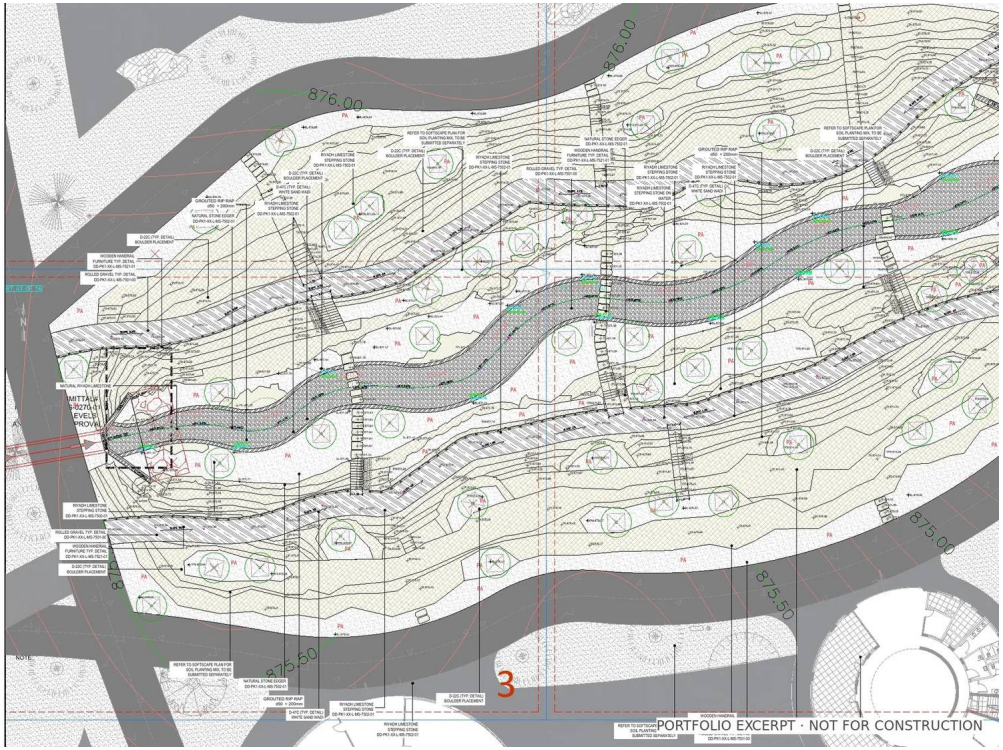

MY CONTRIBUTION

Delivered and reviewed landscape and hardscape shop drawings, construction details, as-built packages, site verification, and buildable revisions responding to consultant feedback and site conditions.

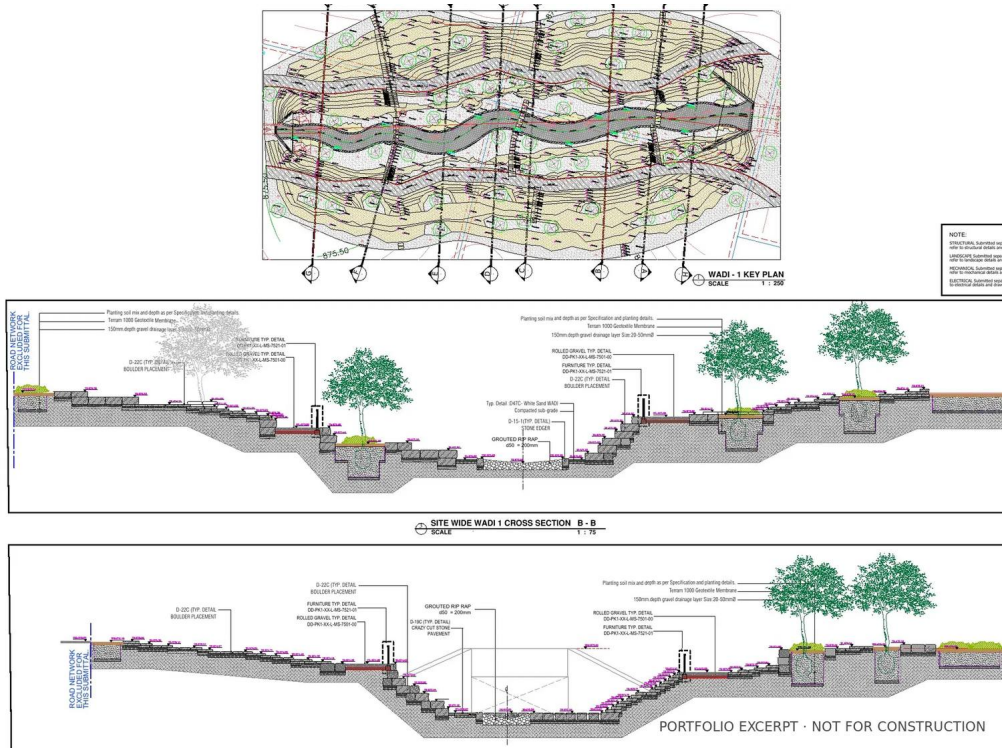

View project and full-size images online

Wadi 1 - plan and section coordination

Connecting the landscape layout with its sectional information.

Wadi 1 - landscape shop drawing plan

Wadi 1 - cross sections A-B

MY CONTRIBUTION

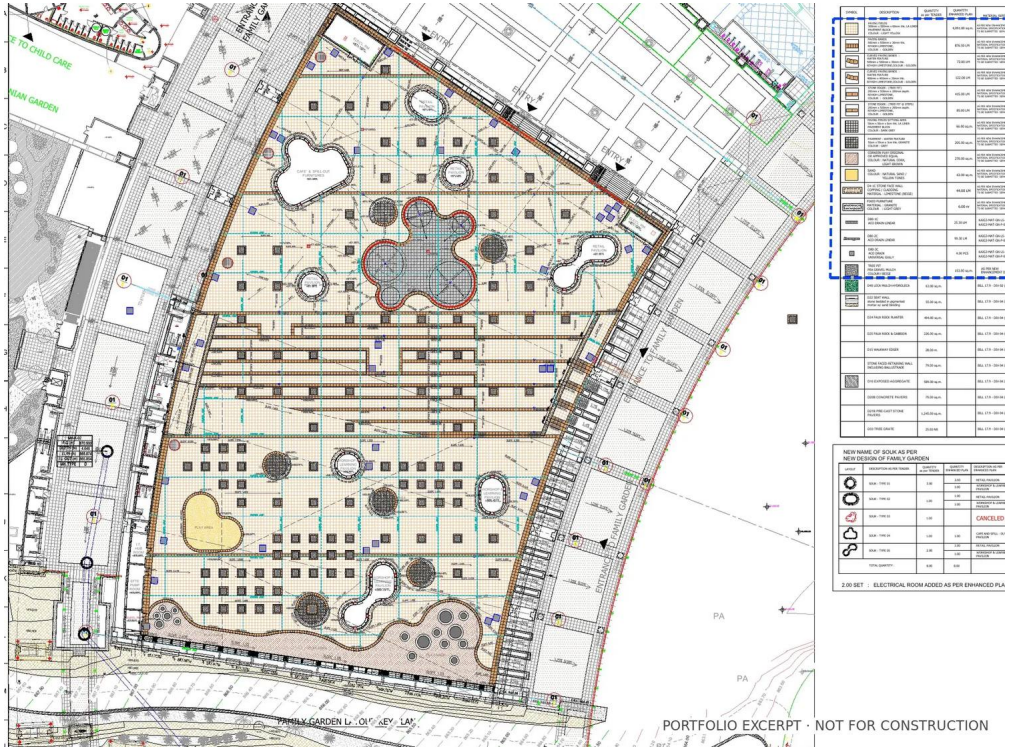

Produced and reviewed landscape plans, levels, and sections as part of the technical-office package.

DOCUMENTED OUTPUT

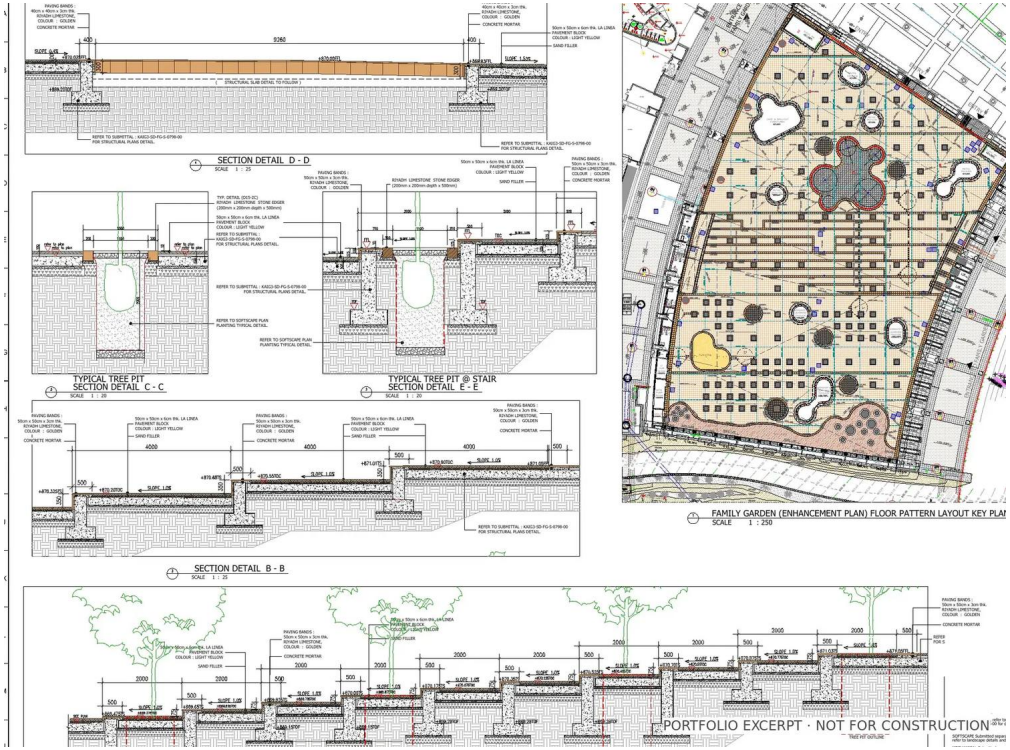

A plan excerpt paired with cross sections A-B shows the layout and vertical relationships together.

Family Garden - from layout to construction detail

Carrying the garden layout into paving, stair, and tree-pit details.

Family Garden - landscape shop drawing plan

Family Garden - paving, stair and tree-pit details

MY CONTRIBUTION

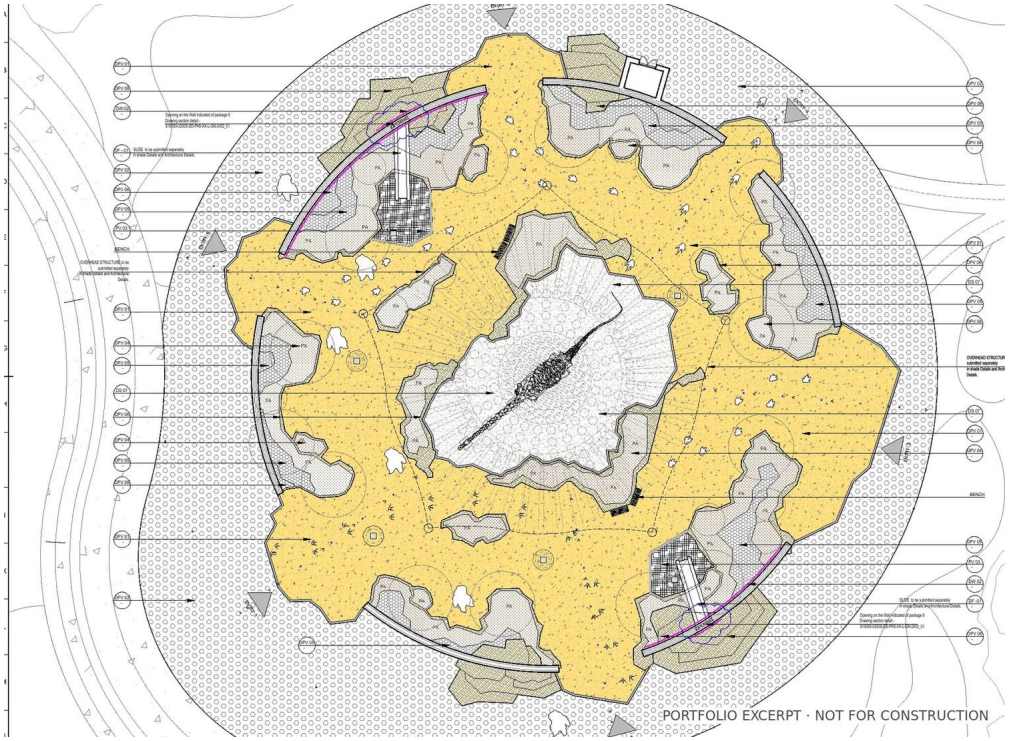

Developed and reviewed hardscape plans and construction details for landscape documentation.

DOCUMENTED OUTPUT

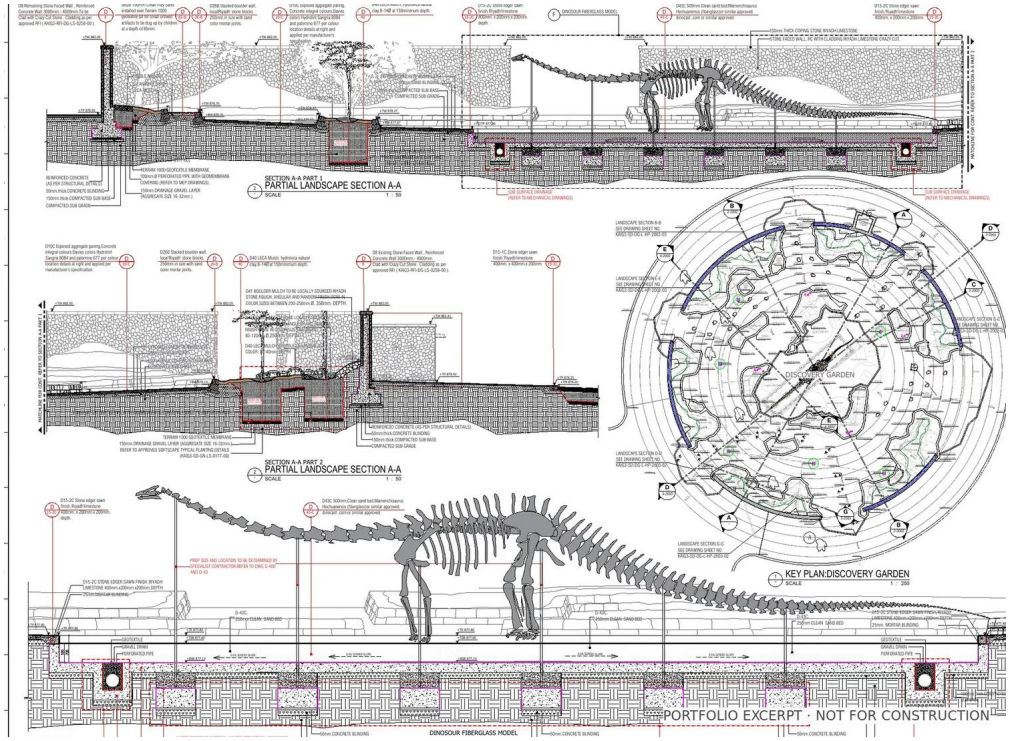

The layout is presented alongside its paving, stair, and tree-pit detail excerpts.

Discovery Garden - coordinated drawing package

Keeping plans, sections, and details consistent within a garden package.

Discovery Garden - landscape shop drawing plan

Discovery Garden - sections and construction details

MY CONTRIBUTION

Prepared and reviewed landscape drawing packages, checking plans against sections and construction details.

DOCUMENTED OUTPUT

Plan and detail excerpts make the relationship between the overall layout and its technical documentation visible.

Security Aviation Leadership Building

BIM Architect - Technical Office | Safwa Riyadh General Contracting Co.

Approved exterior visualization. Project drawings and models are not included.

CONFIDENTIAL / SELECTED SCOPE

Developed architectural redesign, Revit-based design information, working drawings, shop drawings, technical details, quantity take-offs, and material-review packages within controlled information requirements.

DELIVERY

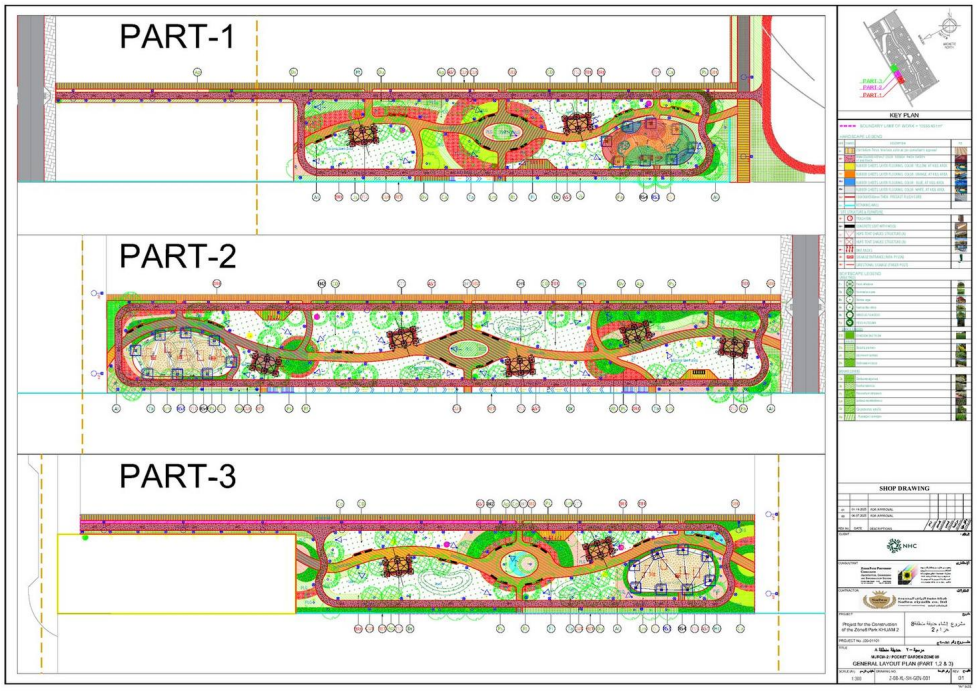

Revit documentation, architectural shop drawings, technical details, material submittals and review support.

View project and full-size images online

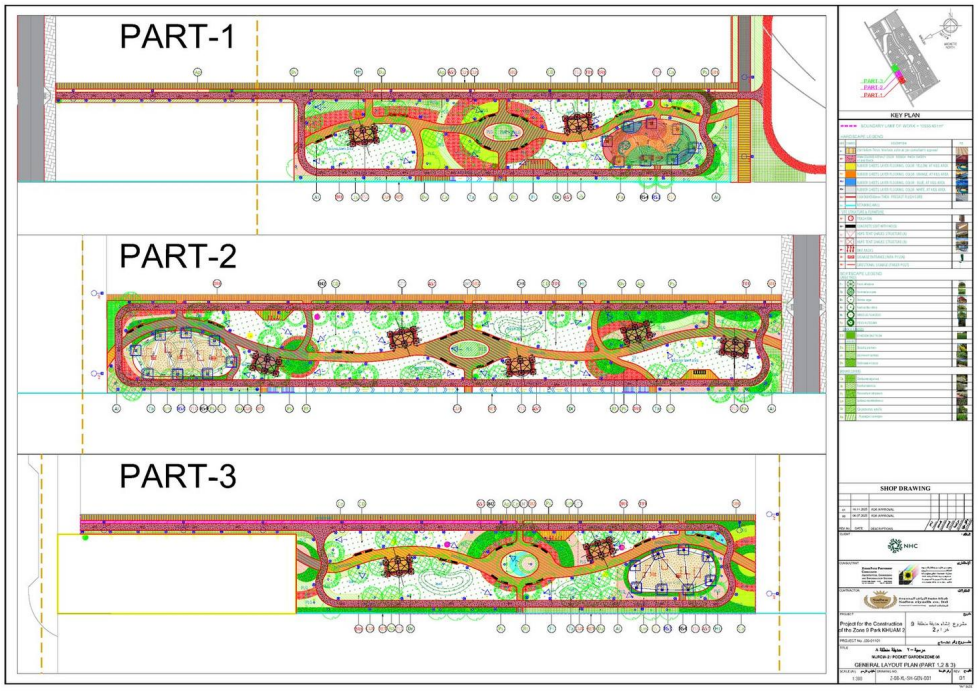

Marsa, Khuzam

Technical Office Landscape Architect | Six parks | Approx. 35,000 m²

Safwa Riyadh General Contracting Co. | NHC | Zuhair Fayez Partnership

Al-Khuzama Gardens - Zone 8

Al-Khuzama Gardens - Zone 9

Developed landscape shop drawings and refined design details for six parks, supported by 3D models and visualizations for technical reviews and client presentations.

View project and full-size images online

Residential facade studies

Technical Office Architect | Zad Engineering Consulting Office | 07/2021 - 11/2023

Residential facade - front view

Residential facade - perspective

Architectural visualization developed to communicate facade composition, materials, and entrance design. Front and perspective views are presented together.

View project and full-size images online

Services complex

Technical Office Architect | Zad Engineering Consulting Office

Site layout visualization

Aerial visualization

Architectural and landscape visualization for design development and presentation. The site view and aerial view communicate building arrangement, access, parking, and landscape.

SHAHER TOOLS

Gypsum Board Designer is a SHAHER TOOLS module for gypsum ceiling layouts, system updates, openings, and quantity schedules in Revit.

Ceiling system updates

Adjust member positions, system spacing, and ceiling height within an existing gypsum-board system.

Openings and framing

Create openings from MEP elements or manual rectangles, with clearance and reinforcement-frame options.

Quantity schedules

Organize gypsum-board components across Revit categories for multi-category quantity schedules.

SHAHER TOOLS overview
