Technical Office Architect | Architecture & Landscape

PROFESSIONAL SUMMARY

Technical Office Architect with 5+ years of experience delivering architectural and landscape packages across buildings, parks, streetscape, and large-scale developments in Saudi Arabia and Egypt. Professionally accredited as an Architect by the Saudi Council of Engineers (SCE), with experience in design development, shop drawings, technical detailing, quantity take-offs, material submittals, and consultant approvals.

CORE COMPETENCIES

Technical Office	Architectural & Landscape Packages	Design Development	Shop Drawings	Construction Details
BIM-Based Documentation	Drawing Review	Quantity Take-Offs	Material Submittals	As-Built Drawings

PROFESSIONAL EXPERIENCE

SAFWA RIYADH GENERAL CONTRACTING CO.

Riyadh, Saudi Arabia | Nov 2025 - Present

Architect & Landscape Architect - Technical Office (Head Office)

- Deliver architectural and landscape technical-office packages across five projects, covering design development, shop drawings, quantity take-offs, technical reviews, and drawing revisions.
- Produce architectural and landscape shop drawings, working drawings, and technical details by integrating structural, civil, MEP, and other discipline requirements.
- Evaluate supplier technical data, samples, materials, finishes, and product proposals against project specifications to support compliant material selection.
- Coordinate material submittals and consultant approval follow-up, aligning technical requirements among suppliers, consultants, and project teams.

SELECTED PROJECTS

Security Aviation Leadership Building - Riyadh, Saudi Arabia

Role: Architect - Technical Office | Confidential project: public scope intentionally limited

- Developed the architectural redesign and design-development package in line with updated project requirements.
- Developed and maintained the architectural Revit model and delivered design, working, and shop drawings with technical details through BIM-based workflows.
- Produced architectural quantity take-offs and reviewed finishes, supplier technical data, and material submittals through consultant review and approval.
- Supported resolution of architectural interfaces and drawing inconsistencies across related disciplines.

Housing Projects Parks - Saudi Arabia

11 parks | Approx. 98,000 m2 | Role: Technical Office Landscape Architect

- Delivered landscape shop-drawing, technical-detail, and documentation packages, adapting design solutions to project and site requirements.
- Coordinated landscape packages, supplier requirements, material reviews, and submittals to support specification compliance and consultant approval.

SELECTED PROJECTS - CONTINUED

Marsa, Khuzam - Riyadh, Saudi Arabia

6 landscape parks | Approx. 35,000 m² | Role: Technical Office Landscape Architect

- Developed landscape shop drawings and refined design details for six parks.
- Created 3D models and visualizations to communicate design proposals and support technical reviews and client presentations.

Sedayem Jeddah - Streetscape Project

Jeddah, Saudi Arabia | Role: Technical Office Landscape Architect

- Translated streetscape and landscape requirements into construction-ready shop drawings, technical details, and site implementation solutions.
- Integrated related-discipline requirements and coordinated material submittals to support consultant review and package consistency.

Al Ula Project - Saudi Arabia

Approx. 20,000 m² | Role: Technical Office Landscape Architect

- Delivered landscape shop drawings, construction details, and technical documentation, adapting solutions to project requirements and site conditions.
- Produced 3D models and presentation visuals to communicate landscape proposals and support design reviews and stakeholder discussions.

ZAID AL-HUSSEIN & BROTHERS CONTRACTING GROUP

Riyadh, Saudi Arabia | Nov 2023 - Nov 2025

Technical Office Landscape Architect

King Abdullah International Gardens - Riyadh, Saudi Arabia

Approx. 1.5 million m² | Approx. SAR 3 billion | Landscape packages

- Delivered technical-office packages for landscape works on a large-scale Riyadh development.
- Produced and reviewed landscape and hardscape shop and construction drawings covering setting-out, coordinates, grading, levels, sections, and technical details.
- Produced and reviewed as-built drawings reflecting verified site conditions and executed works.
- Converted IFC information, consultant feedback, client requirements, design revisions, and site conditions into buildable technical solutions and updated drawing packages.
- Assembled consultant-submission packages and checked consistency across plans, levels, sections, details, and related disciplines.
- Verified landscape and subcontractor works against approved drawings, specifications, and design requirements before consultant inspections.
- Developed revised drawings and buildable solutions for construction issues arising during site execution.

PROFESSIONAL EXPERIENCE - CONTINUED

ZAD ENGINEERING CONSULTING OFFICE

Egypt | Jul 2021 - Nov 2023

Technical Office Architect

- Delivered architectural shop, working, and as-built drawing packages with construction details for residential and commercial projects.
- Produced code-compliant building permit drawings for regulatory submissions.
- Produced architectural quantity take-offs and created architectural and landscape 3D models, visualizations, and detailed drawings for design development and technical documentation.

EDUCATION

Bachelor of Urban and Regional Planning - Cairo University
